API Documentation

for Hack out West 2015

Spotify

Spotify Web API lets your applications fetch data from the Spotify music catalog and manage user's playlists and saved music. Accessible is also design resources and beta versions of iOS and Android SDKs.

https://developer.spotify.com/

(You'll need to login to create new applications and manage your Spotify credentials to authenticate your requests.)

The Spotify Echo Nest API makes it easy for developers to analyze tracks and to add rich artist and song metadata to their applications.

Api-key: You'll need to register at https://developer.echonest.com/account/register

Dropbox

The Core API provides a flexible way to read and write to Dropbox. It includes support for advanced functionality like search, revisions, and restoring files. While Drop-ins are simpler to integrate and use, the Core API can be a better fit for deeper integration.

https://www.dropbox.com/developers/core

Drop-ins are cross-platform UI components that can be integrated in minutes. The Chooser provides your app with instant access to files in Dropbox, and the Saver makes saving files to Dropbox one-click simple.

Api-key needed : 6929f9543219d0a92f18a3a088f19000

SJ

SJ wants to improve the overall experience when travelling by train and offer an even more enjoyable moment onboard. SJs API for SJs mobile app gives you the possibility to check and manage your current and upcoming trips, check your SJ Prio account and loyalty points and be informed about the real time traffic information. http://s.sjmg.sj.se/swagger-ui/

We also recommend related APIs where SJs data is available, along with other travel operators in the industry, primarily: ResRobot (timetables and booking, https://www.trafiklab.se/api/resrobot-sok-resa) as well as Trafikverkets öppna API (traffic information, https://www.trafiklab.se/api/trafikverket-oppet-api).

Songkick

The Songkick API gives you easy access to the biggest live music database in the world: over 3 million upcoming and past concerts and over 100,000 setlists… and growing every day! Easily add concerts to your website or application.
http://www.songkick.com/developer
Api-key needed: dNLwP5nr2I5OomiG (However they recommend one key per team as then you won't get hit by any usage restrictions.)
